

## Monitor Products Inc: FCX Oil-Fired Condensing Boiler Technical & Sales Seminar

Lucky Distributing and Monitor Products are pleased to announce a one day technical, service and maintenance oriented training seminar for the FCX Oil-Fired Condensing Boiler, and the BS series domestic hot water tanks (DHW).

Date: Wednesday, October 24, 2007

Time: 9 AM - 4 PM

Where: Cold Climate Housing Research Center

1000 Fairbanks Street, Fairbanks, Alaska (on the University of Alaska, Fairbanks campus)

### THIS SEMINAR WILL INCLUDE:

- Opening remarks by Jack Hebert, President and CEO of CCHRC
- An explanation of the condensing boiler system, and how customers are saving up to 50% on their fuel bills, utilizing many of the exclusive Monitor features.
- Viewing of the boiler installation at CCHRC, including side by side comparison with two competitive brands. The Monitor has performed in this location since fall, 2006 under the usual severe arctic conditions. Detailed results of this test program will be available at that time.
- Complete disassembly of the units by Monitor's Technical Director, Mr. Buggs Blicharz.
- A complete service manual with two CD's featuring installation and maintenance and printed information covering installation, start up operation, maintenance, trouble shooting, warranty, burner details, and much more.

There will be plenty of time for Q & A throughout the day. There will also be some discussion concerning special issues raised by severe cold weather operation.

Enclosed please find a registration form. Give me a call if you have any questions, or any comments pertaining to the meeting and/or travel arrangements. We are all looking forward to seeing you in Fairbanks on the 24th!
